

Lesson 6 Assignment Characteristics of Quadratics

Sketch the graph of each function.

1)  $y = -x^2 + 4x - 5$

2)  $y = -2x^2 + 12x - 15$

3)  $y = x^2 - 6x + 5$

4)  $y = -2x^2 + 12x - 21$

5)  $y = x^2 - 4x + 7$

6)  $y = x^2 - 4x$

7)  $y = -\frac{1}{2}x^2 + 2x - 6$

8)  $y = 3x^2 + 6x + 1$
